

1. Draw a vanishing point anywhere you'd like on the page.

2. Draw the same shape in various sizes. The closer the shape is to the vanishing point, the smaller it should be. Get creative with your choice in shape and placement of shapes.

3. Connect the vertices to the vanishing point. Connect the smallest shapes (the shapes closest to the vanishing point) FIRST. Connect the largest shapes LAST.

4. Once you have completed your drawing in pencil, trace everything in sharpie (regular tip).
